

WPC DECKING INSTALLATION GUIDE

www.lvsenwpc.com

Lvsen is a new quality on the market of terraces construction materials. We are a team with many years of experience in the industry, we constantly improve our qualifications in applying high standards of customer service.

We offer our customers ready solutions together with a professional consulting service and a great end result in the form of a private terrace.

Why us?

Competence

Thanks to many years of experience in the composites industry, we propose modern technology, we care for high standards of customer service, we guarantee professional advice together with the construction of the dream terrace.

Premium product

Lvsenterrace boards are the 2nd generation of wood composite, a combination of wood flour and plastics. Innovative design, extremely durable and vivid colors, premium product for people who value quality and high aesthetic values.

Safety

Thanks to the special non-slip surface that drains water, we will avoid dangerous situations on our terrace. Boards do not have splinters, as in a traditional wooden terrace, which makes them more child-friendly.

New quality on the composite materials market.

Non-slip surface

Shield

Flexible polymer coating with high resistance to mechanical damage.

Core

The filling is a traditional first-generation wood composite consisting of wood flour and polyethylene.

PEDESTALS

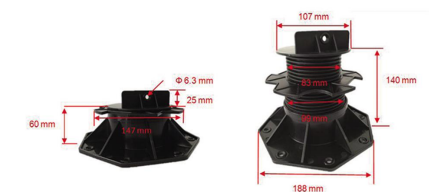

CODE : 91206000

Adjustable height range: 18-30mm
Unit Bearing Capacity: 600kgs
Packing: 150pc/carton
Carton size: 76*38*31cm

CODE : 91207000

Adjustable height range: 30-60mm
Unit Bearing Capacity: 800kgs
Packing: 80pc/carton

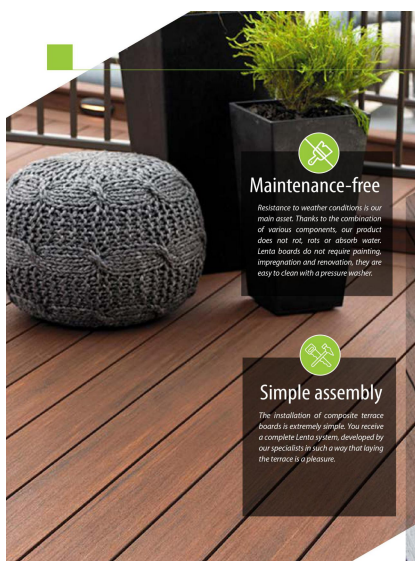

CODE : 91208000

Adjustable height range: 60-140mm
Unit Bearing Capacity: 1700kgs
Packing: 32pc/carton
Carton size: 76*38*31cm

CODE : 91209000

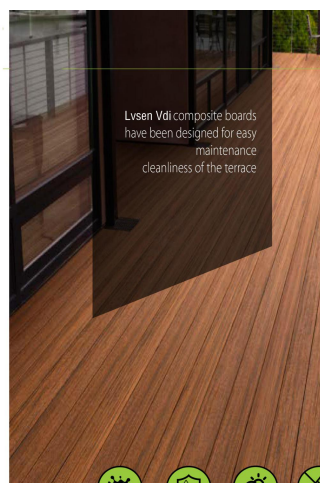

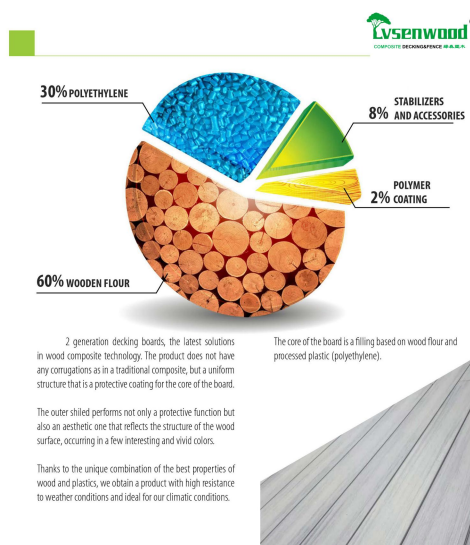

Adjustable height range: 140-220mm
Unit Bearing Capacity: 1766kgs
Packing: 16pc/carton
Carton size: 76*38*31cm

Ecology

This is a product that can be completely recycled. Waste from boards and other elements will always be reused and further processed in the production process.

In addition, the raw material used comes from suppliers that adhere to the principles of sustainable development, forest sustainability and nature conservation.

The Advantages of Lvsen Composites

- resistant to stains and dirt
- the protective layer does not let water through
- resistant to weather conditions
- maintenance-free - board covers never need to be oiled or painted.
- anti-slip
- easy to assemble
- does not absorb water
